

Elements and misc

01 - Changes on Terms Add/View/Edit:

1. The home button was removed as redundant. There are few screens, so if the user feels the need to return to the screen, he can do that through the app's "Back" or "Cancel" buttons or system buttons.
2. The "+" in the lower right corner has been changed to the "Add Term" button placed under Terms swipe items as it will be easier for a user to identify the functionality and reach it.
3. Term swipe items consist with term title and dates is centered due to better readability.
4. Partial header and fields label changes to better reflect the purpose of the screen or a field.
5. Added swipe term text under Edit and Delete icons.
